TECHNICAL SERVICE DOCUMENTATION

A Growing Demand for Service and Repair

Factory sales of VCRs are estimated to reach 13.2 million units, making the total installed base of VCRs in the United States over 31.5 million.

Within 5 years, an estimated 43% of these machines will need servicing. These 31 million users will be searching for fast, dependable, price-competitive servicing.

Take advantage of this money-making opportunity by having the documentation necessary for any brand or model of VCR that your customer needs repaired.

VCRfacts Versus the Manufacturer's Data

Sams standard format gives you much more than even the manufacturer can. Avoid having to adapt to different schematic styles and layouts each time you service equipment from a different manufacturer. Compare Sams VCRfacts with data provided by the manufacturer.

Thorough, Reliable VCR Service Documentation

Technicians get what they need to do the job. This brand-and model-specific data follows the widely-used Photofact™ style featuring loose-leaf text giving each board schematic individually. . .easy-to-use without flipping through a manual.

Sams understands that VCRs are harder to repair due to their compact construction and mechanical and electrical components. VCRfacts data gives you:

- Detailed, board-by-board drawings in both electronic and mechanical detail.
- Schematics are given by board, not by signal flow, allowing faster diagnosis and troubleshooting.
- Board drawings are given for easy component location.
- Mechanical parts are shown in exploded views.
- Complete parts lists for both electrical and mechanical components allow for easy off-shelf replacement.
- Sources, testpoints and voltage sources are shown in color for quicker recognition.
- Board drawings are printed on one side of the sheet to avoid shuffling pages that interrupt repair time.

Sams VCRfacts™

Make Money--Save Time--Make Repairs Easier

At \$21.95 each, VCRfacts will more than pay for themselves with a single repair. Less time spent on repairs will increase turnaround time that creates customer loyalty, repeat business, and referrals. VCRfacts can be even more affordable through Sams "Bonus-Buy Plan" for volume discounts.

Increase productivity. Accelerate Turnaround. Profit

with quality, dependable, service documentation from the people who have provided repair data to technicians for over 40 years. . .Sams.

MORE THAN JUST SCHEMATICS

PHOTOFACT® Provides A Standardized Guide For Servicing

Dependable, Comprehensive Service Documentation

Since 1946, Howard W. Sams & Company has been providing the standard reference used by service technicians and electronics hobbyists for servicing televisions and other popular home electronic products--PHOTOFACT

Manufacturers can't afford to make running changes in their schematics caused by differences between design prototypes and production models. Nor can they afford to develop in-depth service guides for their products. But Howard Sams can--because that's our speciality.

Each Set is Completely Original

You can depend on the reliability of each PHOTOFACT set because the service data is created in our own labs. We work from actual production models, disassembling each unit and testing each board. Every component location, every circuit track and every waveform is checked and re-checked.

Exclusive Time-Saving Features

We use our 41 years of experience to give you important service hints and troubleshooting tips that let you spend more time servicing and less time guessing.

Sams consistent format saves you time, too. You won't have to adapt to different schematic styles and layouts each time you service equipment from a different manufacturer. You won't have to take the manufacturer's documentation "on faith". You won't have to conduct trial-and-error diagnostics because of incomplete documentation.

PHOTOFACT--Easy-To-Use and Economical

You can't get a better product than PHOTOFACT. And you can't get a better value. Your PHOTOFACT distributor offers a variety of purchase options. He can provide you with specific sets or give you total product coverage through an economical Standing Order subscription.
