PROM Installation Guide
Lynx Console Control Unit

DATE: 7/13/92

MODEL: Lynx Console Control Unit (CCU)

REVISION: All

SERIAL NO: All

SOFTWARE: CCU PROM U3

REQUIRED TOOLS:

Static safe workstation IC Extractor/Insertor or
Grounding wrist strap small slotted screwdriver
Phillips screwdriver

REQUIRED PARTS:

Replacement PROM from TimeLine

PROCEDURE:

1. Turn off the power to the Console Control Unit. Disconnect all cables.

2. Remove the CCU from the console and place on a static safe workstation. Ground yourself and the workstation
anti-static mat.

3. Locate U3, remove and replace the PROM. Be careful to correctly align
pin one and properly seat the PROM.

4. Check that jumper JP4 is in the 512K position.

5. Reinstall the CCU into the console.

6. Reconnect the cables and turn on the power. The CCU will automatically detect the new software version. To verify that the upgrade is operating, the new software version number will be displayed after turning the power on.
