

Keyboard Control Unit Software Release Notes

DATE: 07/26/95
MODEL: Keyboard Control Unit (KCU)
REVISION: All
SERIAL NO: All
SOFTWARE:

<u>PROM Name</u>	<u>Version</u>
KCU	333

MANUAL: 73A005

DESCRIPTION:

Keyboard (KCU 333)

The following improvements have been made in the KCU 333 software release:

- Special function keys IN/OUT/CUE now capture while in Solo mode.
- Access to Track Display for more than 24 tracks is now correct.
- CLR + EDIT now properly clears sync points.
- Subframe Trim for REF and SYNCP is now available.
- Record Enable is now available at all times.

Keyboard (KCU 332)

The following improvements have been made in the KCU 332 software release:

- A new GPI options "Sys Mute" has been added. The GPI is designed to mute unless transports are all locked, all stopped or the master is in jog.
- Master machine wind limits have been implemented. These are set by using STORE RW and STORE FF and can be recalled and cleared in the normal manner.
