Lynx JVC Type-C Cable Modification

DATE: 9/20/94

MODEL: JVC Type-C Cable (TimeLine Part Number 71C008)

REVISION: All

SERIAL NO: All

SOFTWARE: V700-10

REQUIRED TOOLS:

Soldering iron

REQUIRED PARTS:

20K Resistor, 1/8 W

Hirose Male Pin, TimeLine Part Number 34W002

DESCRIPTION:

This modification to the JVC Type-C cable improves control of JVC transports.

1. Track Record Arming operates correctly when using a remote controller such as the KCU.
2. When the synchronizer is connected, local control of the transport is now permitted.

PROCEDURE:

1. At the JVC end of the cable (Connector B), install a 20K resistor (R5) from Pin 8 to Pin 34; as shown in schematic 70D021-10.
2. At the JVC end of the cable (Connector B), add a pin to the Black wire from the Black (Org) pair. Install into Pin 15 of Connector B. Verify that Connector A Pin 6 goes to Connector B Pin 15.
